EDUCATION

+2 Education

SOS HGS Gandaki
2021 - 2023

Skills- React/Node/MongoDB

Academind,
Jonas Schmedtmann- Udemy)

Certifications

SoloLearn - Javascript
Udemy - React/Node.js

RESUME OBJECTIVE

A full stack web developer with 2 years of experience creating web applications, deploying and maintaining them. Possess utmost knowledge of React.js, Express.js and MongoDB along with vanilla javascript. Looking to leverage my knowledge and experience into a role as Full Stack Web Developer.

Experience

Freelancer

Fiverr, Upwork, Offline / September 2022 - Present

- Developed backend architecture of websites on Node.js and performed CRUD operations on MongoDB.
- Developed front-end part of websites using React.js / Vanilla Javascript
- Developed full-fledged web apps having incredible UI and robust backend

Full Stack Web Developer (Intern)

Ravin Web Services / October 2022 - April 2023

- Upgraded outdated react codebase based on class to components
- Worked with team and co-ordinated with them through Github and Discord.
- Developed some components and middlewares of React.js and Express.js respectively which was added to different projects.
- Fixed various bugs in the existing and pending projects and improvised the security and authentication

Personal projects

Ballscore

Ballscore gives you real-time sport(football,basketball,cricket) scores using API. You can load matches by particular date, see the competition details(fixtures/results and standings) and also the match detail(lineups,summary,stats) for each match.

Technologies used:ReactJS,ExpressJS,MongoDB,GraphQL

Quiz app

This quiz app lets you choose questions from different categories and it is constrained by time and lets user know when they are running out of time. It also has a feature of reviewing answers.

Technologies used: ReactJS,Modular CSS, API

These are only a fraction of the diverse projects I have developed over time. For all projects,please [CLICK HERE](#).
